

Accurate Health Systems has proven results that demonstrate **rounding** as the single means of making changes that improve health care for your patients and generate cost savings for you. We can show you how our solution reduces or even eliminates laborious tasks and reports real-time rounding scores. We are sure you will want to see these documented results!

e-MedRounds enables hospitals and every health care provider the power to increase efficiency and profit while decreasing the supervisory burden.

The application is web-based allowing easy, but secure, anywhere access to quickly alter configurations or run reports without complication and without an IT staff!

e-MedRounds provides administrators with operational reports in real-time and driven by any parameters including most you can think of; such as, date-range, location, and results by question. Resultant reports may be immediately displayed for printing or e-mailed for timely implementation.

Benefits of e-MedRounds

- Improved accountability through easy, real-time reporting
- Increased patient satisfaction by resolution of root issues in real-time
- Immediate corrective action using automated e-mail and SMS alerts
- Customizable for every and any facility
- Self-managed, on-Demand application significantly makes cost of ownership cost divisible
- Support and upgrades assures you can never outgrow the product
